Feekes 10.1 Feekes 10.1 Feekes 10.3 Feekes 10.5 And up to a week later

Head Emergence Feekes 10.5

The optimum time to apply a single fungicide to suppress Fusarium head blight (scab) and reduce deoxynivalenol (DON) is at Feekes growth stage 10.5 (100% of the main stem heads have fully emerged) and up to seven days later.
